

West Sound

UTILITY DISTRICT

Contract Title: Country Junction Water Main

Description:

West Sound Utility District needed to extend its water main from Mile Hill Drive along Long Lake Road for 200 feet. However, the water main project was delayed due to the contaminated soil at the Country Junction gas station. After several years, the Department of Ecology was able to proceed with the site cleanup which required the removal of a significant amount of soil. The District was able to work with Ecology and its contractor and had the contractor complete the new water main as soon as he completed the cleanup of the site. The new 8-inch water main is now in position to serve future development along Long Lake Road.

Contractor:

Clear Creek Construction from Everett

Contract Cost:

\$22,160 plus State sales tax.

There were no change orders
